

ENVIRONMENTAL PERFORMANCE.

In Cetren we are committed to the environment; for this reason we have implemented an Environmental Management System according to standard ISO 14001.

Despite the fact that the activities we carry out at CETREN do not have much environmental impact, we are committed to reducing as much as possible the effect that our daily activities have on the environment. For this reason, we control, monitor and reduce the impact on the environment and perform awareness-raising actions addressed to our stakeholders.

A series of indicators have been identified for every environmental aspect identified and assessed in CETREN. The values obtained during 2019 are in accordance with the environmental objectives set for the year.

CONSUMPTION INDICATORSS	% consumption related to 2018	WASTE GENERATION INDICATORS	2019 Generated Kg.
PHOTOCOPIES	-9.97%	TONER	6 kg
TONER	22.22%	Waste Stream	208,50 kg
STATIONARY	-1.60%	PAPER	495 kg
ELECTRICITY	-8.87%	BATTERIES	15 kg
		FURNITURE WASTE	0 kg

For the year 2020 we want to continue minimizing consumption as well as waste generation.

We also focus on a circular economy, which will undoubtedly help us to achieve the objectives set. Therefore it is important to perform actions such as: repair, recycle and reuse, thus lengthening the useful life of any type of equipment and/or appliance and considerably reducing waste generation, even giving equipment a second life, instead of throwing it away.
